

Demo Study: Research Trend Analysis for AI-Assisted Literature Review

Research Copilot Demo Team

Year: 2026

Abstract

This synthetic document explains a product demonstration scenario for research trend analysis and AI-assisted literature review generation.

Keywords

literature review; RAG retrieval; trend dashboard; academic writing; citation

Methods

The method section connects keyword analysis, yearly publication trends, retrieval augmented generation, structured review drafting, and reference formatting.

Experiment Design Notes

Model comparison, ablation analysis, error taxonomy, statistical reporting, and reproducible experiment logging are prepared as demonstration content.

Conclusion

The workflow shows how platform capabilities support a continuous path from literature ingestion to publishable draft preparation.

Demo Disclaimer

This PDF is synthetic and is used only to record a product demonstration. It is not a real publication and should not be cited as academic evidence.
